# Index of Subjects

*Acomys cahirinus*; the response of the Egyptian spiny mouse and two other species of commensal rodents to anticoagulant rodenticides, 329
Adenovirus eye infections in an Australian city, 1972–9, 95
Antibody capture radioimmunoassay for anti-rubella IgM, 139
Antigenic scheme for *Citrobacter koseri* (syn. *C. diversus*, *Levinea malonatica*); three new antigens recognized in strains from Israel, 111
Anti-rubella IgM; antibody capture radioimmunoassay, 139
Ascending urinary tract infections; contamination of chlorhexidine cream used to prevent, 295
Aspects of the epidemiology of bovine tuberculosis in the badgers and cattle. I. The prevalence of infection in two wild animal populations in south-west England, 237
Aspects of the epidemiology of bovine tuberculosis in badgers and cattle. II. The development and use of a typing system for *Mycobacterium bovis*, 247

*Bacillus anthracis*; the occurrence and significance of in sewage and sewage sludges, 129
Bromadiolone; field trials of bromadiolone against infestations of warfarin-resistant *Rattus norvegicus*, 363
*Brucella abortus*; the occurrence and significance to animal health of in sewage and sewage sludges, 129

*Campylobacter jejuni*; experimental infection of Rhesus monkeys with a human strain of, 343
Chlorhexidine; contamination of chlorhexidine cream used to prevent urinary tract infections, 295
*Citrobacter koseri*; Antigenic scheme for (syn. *C. diversus*, *Levinea malonatica*); three new antigens recognized in strains from Israel, 111
Comparative study of spirochaetes from the porcine alimentary tract, 173
Comparison between immunoadherence and radioimmunoassay; epidemiological and serological study of hepatitis A virus outbreaks in France, 155
Comparison of four methods for exclusion of non-specific serum inhibitors, 315
Coagulase-negative and coagulase-positive staphylococci on skin; transfer of gentamicin resistance between, 183
Colony incompatibility studies among New Zealand and Australian isolates of *Salmonella typhimurium* phage type 179, 353
Contamination of chlorhexidine cream used to prevent ascending urinary tract infections, 295

Detection and quantification of IgM, IgA, $IgG_1$ and $IgG_2$ antibodies against foot-and-mouth disease virus from bovine sera using an enzyme-linked immunosorbent assay, 79
Diagnosis of recent hepatitis A infection: a comparison of two methods for detecting specific IgM, 71
Diet and the faecal microflora of infants, children and adults in rural Nigeria and urban U.K., 285
Diversity of plasmids responsible for multiple resistance in klebsiella serotype K2, 189
Duration of the immune response in subjects inoculated with antimeningococcal A and C vaccines kept in storage at $-20$ °C and at 4 °C: influence of pre-vaccination titres on the vaccinal response, 117

Epidemiological and serological study of hepatitis A virus outbreaks in France: a comparison between immunoadherence and radioimmunoassay, 155
Epidemiology of bovine tuberculosis in badgers and cattle. I. The prevalence of infection in two wild animal populations in south-west England, 237
Epidemiology of bovine tuberculosis in badgers and cattle. II. The development and use of a typing system for *Mycobacterium bovis*, 247

Epidemiology of influenza; the role of season in the, 35
*Escherichia coli*; the occurrence and significance to animal health of in sewage and sewage sludges, 129
Evaluation of a portable air purifier, 203
Example of regression analysis; monitoring infectious diseases using routine microbiology data. II. Used to study infectious gastroenteritis, 59
Experimental infection of Rhesus monkeys with a human strain of *Campylobacter jejuni*, 343

Faecal microflora of infants; diet and the, children and adults in rural Nigeria and urban U.K., 285
Field trials of bromadiolone against infestations of warfarin-resistant *Rattus norvegicus*, 363
Foot-and-mouth disease virus; detection and quantification of IgM, IgA, $IgG_1$ and $IgG_2$ antibodies against foot-and-mouth disease virus from bovine sera using an enzyme-linked immunosorbent assay, 79

Gastroenteritis in an urban area; monitoring infectious diseases using routine microbiology data. I. Study of, 49
Gastroenteritis; monitoring infectious diseases using routine microbiology data. II. An example of regression analysis used to study infectious gastroenteritis, 59
Gull faeces; seagulls (*Laurus* spp.) as vectors of salmonellae: an investigation into the range of serotypes and numbers of salmonellae in, 195

Hand hygiene; the importance of soap selection for routine hand hygiene in hospital, 275
Hepatitis A virus infections in Voyvodina, 105
Hepatitis A virus outbreaks in France; epidemiological and serological study of: a comparison between immunoadherence and radioimmunoassay, 155
Hepatitis A; diagnosis of recent hepatitis A infection: a comparison of two methods for detecting specific IgM, 71
Hepatitis B core antigen in acute and chronic hepatitis B; IgM-antibody response to the, 163
Hepatitis B; the prevalence of hepatitis B infection amongst urban and rural populations in Western Samoa, 87

IgM-antibody response to the hepatitis B core antigen in acute and chronic hepatitis B, 163
Infections with influenza A/Victoria virus in Houston families, 1976, 303
Infectious bovine rhinotracheitis virus in Scotland; the prevalence of serum neutralizing antibodies to, 209
Infestations of warfarin-resistant *Rattus norvegicus*; field trials of bromadiolone against, 363
Influence of pre-vaccination titres on the vaccinal response; duration of the immune response in subjects inoculated with antimeningoccal A and C vaccines kept in storage at $-20$ °C and at 4 °C, 117
Influenza A/Victoria virus in Houston families, 1976; infections with, 303
Influenza; the role of season in the epidemiology of influenza, 35
Influenza; responses of volunteers to inactivated influenza virus vaccines, 1
Influenza; seroepidemiology of H1N1 influenza: the infection and re-infection rate in winter 1978–79, 27
Influenza A; strain specificity of serum antibody to the haemagglutinin of influenza A (H3N2) viruses in children following immunization or natural infection, 17
Immunization or natural infection; strain specificity of serum antibody to the haemagglutinin of influenza A (H3N2) viruses in children following, 17
Importance of soap selection for routine hand hygiene in hospital, 275

*Larus*; seagulls as vectors of salmonellae: an investigation into the range of serotypes and numbers of salmonellae in gull faeces, 195
*Leptospira*; the occurrence and significance to animal health of in sewage and sewage sludges, 129

Meningococcal vaccine; duration of the immune response in subjects inoculated with anti-meningococcal A and C vaccines kept in storage at −20 °C and at 4 °C: influence of pre-vaccination titres on the vaccinal response, 117
Monitoring infectious diseases using routine microbiology data. I. Study of gastroenteritis in an urban area, 49
Monitoring infectious diseases using routine microbiology data. II. An example of regression analysis used to study infectious gastroenteritis, 59
Multiple resistance in klebsiella serotype K2, diversity of plasmids responsible for, 189
*Mycobacterium*; the occurrence and significance to animal health of in sewage and sewage sludges, 129
*Mycobacterium bovis*; aspects of the epidemiology of bovine tuberculosis in badgers and cattle. II. The development and use of a typing system for, 247

Observations on the occurrence of Salmonella *cholerae-suis* and other salmonellas in two herds of feeder pigs, 369
Occurrence and significance to animal health of *Leptospira*, *Mycobacterium*, *Escherichia coli*, *Brucella abortus* and *Bacillus anthracis* in sewage and sewage sludges, 129
Otitis externa; an outbreak of otitis externa in competitive swimmers due to *Pseudomonas aeruginosa*, 357
Outbreak of otitis externa in competitive swimmers due to *Pseudomonas aeruginosa*, 357

Plasmids; diversity of plasmids responsible for multiple resistance in klebsiella serotype K2, 189
Porcine alimentary tract; a comparative study of spirochaetes from the, 173
Portable air purifier; evaluation of, 203
Prevalence of hepatitis B infection amongst urban and rural populations in Western Samoa, 87
Prevalence of serum neutralizing antibodies to infectious bovine rhinotracheitis virus in Scotland, 209
*Pseudomonas aeruginosa*; an outbreak of otitis externa in competitive swimmers due to, 357

*Rattus norvegicus*; field trials of bromadiolone against infestations of warfarin-resistant, 363
Respiratory virus infection on paediatric wards; a two-year prospective study of hospital-acquired, 335
Response of the Egyptian spiny mouse (*Acomys cahirinus*) and two other species of commensal rodents to anticoagulant rodenticides, 329
Rhesus monkeys with a human strain of *Campylobacter jejuni*; experimental infection of, 343
Rodenticides; the response of the Egyptian spiny mouse (*Acomys caharinus*) and two other species of commensal rodents to anticoagulant rodenticides, 329
Routine band hygiene in hospital; the importance of soap selection for, 275
Rubella serology: a comparison of four methods for exclusion of non-specific serum inhibitors, 315
Rubella; antibody capture radioimmunoassay for anti-rubella IgM, 139

*Salmonella cholerae-suis*; observations on the occurrence of and other salmonellas in two herds of feeder pigs, 369
Salmonellae isolated from domestic meat waste, 259
Salmonellae; seagulls (*Larus* spp.) as vectors of salmonellae: an investigation into the range of serotypes and numbers of salmonellae in gull faeces, 195
*Salmonella oranienburg*; salmonellosis in Indonesia: phage-type of obtained from hospitalized patients in Jakarta, Indonesia, 227
*Salmonella typhimurium*; colony incompatibility studies among New Zealand and Australian isolates of, phage type 179, 353
Salmonellosis in Indonesia: phage-type of *Salmonella oranienburg* obtained from hospitalized patients in Jakarta, Indonesia, 227
Seagulls (*Larus* spp.) as vectors of salmonellae: an investigation into the range of serotypes and numbers of salmonellae in gull faeces, 195

Seroepidemiology of H1N1 influenza: the infection and re-infection rate in winter 1978–79, 27
Serotypes and numbers of salmonellae in gull faeces; seagulls (*Larus* spp.) as vectors of salmonellae: an investigation into the range of, 195
Serum antibody; strain specificity of, to the haemagglutinin of influenza A (H3N2) viruses in children following immunization or natural infection, 17
Serum neutralizing antibodies; the prevalence of to infectious bovine rhinotracheitis virus in Scotland, 209
Sewage; viruses in sewage as an indicator of their presence in the community, 217
Sewage; the occurrence and significance to animal health of *Leptospira*, *Mycobacterium*, *Escherichia coli*, *Brucella abortus* and *Bacillus anthracis* in sewage and sewage sludges, 129
Soap; the importance of soap selection for routine hand hygiene in hospital, 275
Spirochaetes; a comparative study of spirochaetes from the porcine alimentary tract, 173
Staphylococci; transfer of gentamicin resistance between coagulase-negative and coagulase-positive staphylococci on skin, 183
Streptococcal antibodies in patients with burn injuries, 265

Transfer of gentamicin resistance between coagulase-negative and coagulase-positive staphylococci on skin, 183
Tuberculosis; aspects of the epidemiology of bovine tuberculosis in badgers and cattle. II. The development and use of a typing system for *Mycobacterium bovis*, 247
Tuberculosis; aspects of the epidemiology of bovine tuberculosis in badgers and cattle. I. The prevalence of infection in two wild animal populations in south-west England, 237
Two year prospective study of hospital-acquired respiratory virus infection on paediatric wards, 335

Urinary tract infections; contamination of chlorhexidine cream used to prevent urinary tract infections, 295

Viruses in children; strain specificity of serum antibody to the haemagglutinin of influenza A (H3N2) following immunization or natural infection, 17
Viruses in sewage as an indicator of their presence in the community, 217
Virus vaccines; responses of volunteers to inactivated influenza, 1

## Index of Subjects

ABO blood groups, the relationship between epidemic influenza $A(H_1N_1)$ and, 139
Antibiotic residues, effect of cooking and cold storage on biologically active, in meat, 511
Antibody-coated bacteria test, correlation between uropathogenic properties of *Escherichia coli* from urinary tract infections and the, and comparison with faecal strains, 53

*Bacteroides* species in the normal neonatal faecal flora, 299
BCG vaccination of children against leprosy in Uganda: final results, 233
Brodifacoum, comparative effect of the three rodenticides warfarin, difenacoum and, on eight rodent species in short feeding periods, 101
Brodifacoum, evaluation of, against *T. indica*, M. *hurrianae* and *R. rattus*, 179
Bromadiolone, trials of the anticoagulant rodenticides, and difenacoum against the house mouse (*Mus musculus* L.), 171

Campylobacter enteritis associated with the consumption of free school milk, 155
*Campylobacter jejuni*, serological studies in two outbreaks of, infection, 163
*Campylobacter jejuni*, the occurrence of, in fresh food and survival under different conditions, 421
*Chlamydia trachomatis*, the presentation and incidence of paratrachoma in adults, 63
Coliform organisms, a comparison of confirmatory media for, and *Escherichia coli* in water, 369
*Corynebacterium haemolyticum* infections in Sri Lanka, 271
Crohn's disease, antibodies to *Eubacterium* and *Peptostreptococcus* species and the estimated probability of, 25
Crohn's disease, serum agglutinins to *Eubacterium* and *Peptostreptococcus* species in, other diseases, 13
Crohn's disease, the faecal flora of patients with, 1

Dialysis units, hepatitis in, in the United Kingdom: a Public Health Laboratory Service Survey, 443
Difenacoum, comparative effect of the three rodenticides warfarin, and brodifacoum on eight rodent species in short feeding periods, 101
Difenacoum, trials of the anticoagulant rodenticides bromadiolone and, against the house mouse (*Mus musculus* L.), 171

Echovirus type 11 infection in Melbourne – 1953 to 1980, 305
Enteric pathogens, use of the India-ink Immuno-reaction for the rapid detection of enteric pathogens in two areas of Nigeria, 493
*Enterobacteriaceae*, comparison of the Microbact-12E and 24E systems and the API-20E system for the identification of, 287
Equine mycoplasmas, the relationship of two, to *Mycoplasma mycoides*, 93
*Escherichia coli*, a comparison of confirmatory media for coliform organisms and, in water, 369
*Escherichia coli*, correlation between uropathogenic properties of, from urinary tract infections and the antibody-coated bacteria test and comparison with faecal strains, 53
*Escherichia coli* in gastroenteritis of children in Auckland, New Zealand, 413
*Escherichia coli* resistant to tetracyclines and to other antibiotics in the faeces of U.K. chickens and pigs in 1980, 477
*Eubacterium*, antibodies to, and *Peptostreptococcus* species and the estimated probability of Crohn's disease, 25
*Eubacterium*, serum agglutinins to, and *Peptostreptococcus* species in Crohn's and other diseases, 13

Faecal flora of patients with Crohn's disease, 1
Furazolidone resistance in *Salmonella gallinarum*: the relationship between *in vitro* and *in vivo* determinations of resistance, 71

Gastroenteritis, *Escherichia coli* in, of school-children in Auckland, New Zealand, 413
Gentamicin-resistant enterobacteria, variation in skin and environmental survival of hospital, 277

Hepatitis in dialysis units in the United Kingdom: a Public Health Laboratory Service Survey, 443
House mouse (*Mus musculus* L.), trials of the anti-coagulant rodenticides bromadiolone and difenacoum against the, 171

India-ink Immuno-reaction, use of the, for the rapid detection of enteric pathogens in two areas of Nigeria, 493
Influenza A, antibody response to immunization with, /USSR/77 (H1N1) virus in young individuals primed or unprimed for A/New Jersey (H1N1) virus, 201
Influenza A, antigenicity in hamsters of inactivated vaccines prepared from recombinant influenza viruses, 453
Influenza, a five-year study of, in families, 191
Influenza A($H_1N_1$), the relationship between epidemic, and ABO blood groups, 139
Influenza A virus, antibody responses after repeated, immunizations among schoolchildren in Japan, 383
Influenza B at Christ's Hospital: natural antibody to influenza B estimated by radial haemolysis, 211
Influenza virus, frequency of naturally occurring antibody to, antigenic variants selected *in vitro* with monoclonal antibody, 185
Influenza virus type B, recombinants of, as potential live vaccine candidates: RNA characterization and evaluation in man, 43

Leprosy, BCG vaccination of children against, in Uganda: final results, 233
Leptospires, ecological aspects of the epidemiology of infection with, of the Ballum serogroup in the black rat (*Rattus rattus*) and the brown rat (*Rattus norvegicus*) in New Zealand, 427

Meat handlers: skin sepsis in, observations on the causes of injury with special reference to bone, 465
Milk, campylobacter enteritis associated with the consumption of free school, 155
*Mycoplasma mycoides* subspecies *mycoides*, the ability of, and closely related strains from goats and sheep to immunize mice against subspecies *capri*, 321
*Mycoplasma mycoides* subsp. *mycoides*, observations on the antigenic differences between the so-called SC and LG strains of, 437
*Mycoplasma mycoides*, the relationship of two equine mycoplasmas to, 93

Neonatal faecal flora, *Bacteroides* species in the normal, 299

Parainfluenza virus infections in the Cirencester Survey: Seasonal and other characteristics, 393
Paratrachoma, the presentation and incidence of, in adults, 63
*Peptostreptococcus*, antibodies to *Eubacterium* and, species and the estimated probability of Crohn's disease, 25
*Peptostreptococcus*, serum agglutinins to *Eubacterium* and, species in Crohn's and other diseases, 13
Pertussis vaccine, reducing the endotoxic activity of, 377
Pregnancy, comparison of radioimmunoassay and the gel filtration technique for routine diagnosis of rubella during, 249
Pregnancy, outcome of asymptomatic infection with rubella virus during, 147

Rappaport's enrichment medium, isolation of *Salmonella* with the use of 100 ml of the R 10 modification of, 35
Recurrent pyogenic cholangitis, the bacteriology of, and associated diseases, 407
Rodenticides, comparative effect of the three, warfarin, difenacoum and brodifacoum on eight rodent species in short feeding periods, 101
Rodenticides, evaluation of broadifacoum against *T. indica*, *M. hurrianae* and *R. rattus*, 179

Rodenticides, trials of the anticoagulant, bromadiolone and difenacoum against the house mouse (*Mus musculus* L.), 171
R plasmids, change of drug resistance patterns and genetic properties of, in *Salmonella typhimurium* of bovine origin isolated from 1970 to 1979 in northern Japan, 257
R-plasmids, factors influencing the establishment and spread of, in an experimental model of urinary tract infection, 83
Rubella, are many women immunized against, unnecessarily? 131
Rubella, comparison of radioimmunoassay and the gel filtration technique for routine diagnosis of, during pregnancy, 249
Rubella, outcome of asymptomatic infection with, virus during pregnancy, 147

Salmonella, comparison of selenite F, Muller-Kauffmann tetrathionate and Rappaport's medium for, isolation from chicken giblets after pre-enrichment in buffered peptone water, 219
*Salmonella dublin* infection of calves: use of small doses to simulate natural infection on the farm, 501
*Salmonella gallinarum*, furazolidone resistance in, the relationship between *in vitro* and *in vivo* determinations of resistance, 71
Salmonella in the intestinal tract and associated lymph nodes of sheep and cattle, 225
*Salmonella*, isolation of, with the use of 100 ml of the R 10 modification of Rappaport's enrichment medium, 35
*Salmonella typhimurium*, change of drug resistance patterns and genetic properties of R plasmids in, of bovine origin isolated from 1970 to 1979 in northern Japan, 257
*Salmonella zanzibar*, an unusual sequel to imported, 525
Selective media, comparison of selenite F, Muller-Kauffmann tetrathionate and Rappaport's medium for Salmonella isolation from chicken giblets after pre-enrichment in buffered peptone water, 219
*Shigella sonnei*, comparison of four methods of differential typing of isolates of, 339
*Shigella sonnei*, discrimination by multiple typing of isolates of, in Dundee (1971–6), 357
*Streptococcus pyogenes* in the throat: a study in a small population, 1962–1975, 109

Toxoplasmosis and the wild rabbit *Oryctolagus cuniculus* in Victoria, Australia with suggested mechanisms for dissemination of oocysts, 331

Urinary tract infections, correlation between uropathogenic properties of *Escherichia coli* from, and the antibody-coated bacteria test and comparison with faecal strains, 53
Urinary tract infection, factors influencing the establishment and spread of R-plasmids in an experimental model of, 83
Uropathogenic properties, correlation between, of *Escherichia coli* from urinary tract infections and the antibody-coated bacteria test and comparison with faecal strains, 53

Vaccines, antibody responses after repeated influenza A virus immunizations among school-children in Japan, 383
Vaccines, antibody response to immunization with influenza A/USSR/77 (H1N1) virus in young individuals primed or unprimed for A/Jersey/76 (H1N1) virus, 201
Vaccines, antigenicity in hamsters of inactivated, prepared from recombinant influenza viruses, 453
Vaccines, are many women immunized against rubella unnecessarily? 131
Vaccines, recombinants of influenza virus type B as potential live, candidates: RNA characterization and evaluation in man, 43
*Vibrio parahaemolyticus*, a study of the incidence of, in Malaysian shrimp undergoing processing for export, 485
Virus diarrhoea associated with pale fatty faeces, 313

Warfarin, comparative effect of the three rodenticides, difenacoum and brodifacoum on eight rodent species in short feeding periods, 101
Water, a comparison of confirmatory media for coliform organisms and *Escherichia coli* in, 369
Wild rabbit, toxoplasmosis and the, *Oryctolagus cuniculus* in Victoria, Australia with suggested mechanisms for dissemination of oocysts, 331

No. 1 (August 1981)

PAGE

Wensinck, F., Custers-Van Lieshout, L. M. C., Poppelaars-Kustermans, P. A. J. and Schröder, A. M. The faecal flora of patients with Crohn's disease. . . 1

Wensinck, F. and Van de Merwe, J. P. Serum agglutinins to *Eubacterium* and *Peptostreptococcus* species in Crohn's and other diseases. . . . . 13

Van de Merwe, J. P., Schmitz, P. I. M. and Wensinck, F. Antibodies to *Eubacterium* and *Peptostreptococcus* species and the estimated probability of Crohn's disease . 25

Vassiliadis, P., Trichopoulos, D., Kalapothaki, V. and Sérié, Ch. Isolation of *Salmonella* with the use of 100 ml of the R10 modification and Rappaport's enrichment medium . . . . . 35

Lobmann, M., Delem, A., Jovanovic, D. and Peetermans, J. Recombinants of influenza type B as potential live vaccine candidates: RNA characterization and evaluation in man . . . . . 43

Brooks, Heather J. L., Benseman, Barbara A., Peck, Jayne and Bettelheim, K. A. Correlation between uropathogenic properties of *Escherichia coli* from urinary tract infections and the antibody-coated bacteria test and comparison with faecal strains . . . . . 53

Tullo, Andrew B., Richmond, Shirley J. and Easty, David L. The presentation and incidence of paratrachoma in adults . . . . . 63

Williams Smith, H., Tucker, J. F. and Lovell, M. Furazolidone resistance in *Salmonella gallinarum*: the relationship between *in vitro* and *in vivo* determinants of resistance 71

Snowshill, Laureen, Towner, K. J. and Lewis, M. J. Factors influencing the establishment and spread of R-plasmids in an experimental model of urinary tract infection . . . . . 83

Lemcke, R. M., Ernø, H. and Gupta, U. The relationship of two equine mycoplasmas to *Mycoplasma mycoides* . . . . . 93

Lund, M. Comparative effect of the three rodenticides warfarin, difenacoum and brodifacoum on eight rodent species in short feeding periods . . . . 101

Hope-Simpson, R. Edgar. *Streptococcus pyogenes* in the throat: a study in a small population, 1962–1975 . . . . . 109

Mortimer, P. P., Edwards, J. M. B., Porter, A. D., Tedder, R. S., Mace, J. E. and Hutchinson, A. Are many women vaccinated against rubella unnecessarily? 131

Lebiush, M., Rannon, L. and Kark, J. D. The relationship between epidemic influenza A ($H_1N_1$) and ABO blood groups . . . . . 139

No. 2 (October 1981)

Cradock-Watson, J. E., Ridehalgh, Margaret K. S., Anderson, M. J. and Pattison, J. R. Outcome of asymptomatic infection with rubella virus during pregnancy . 147

Jones, P. H., Willis, A. T., Robinson, D. A., Skirrow, D. A. and Josephs, D. S. Campylobacter enteritis associated with the consumption of free school milk . 158

PAGE

JONES, D. M., ROBINSON, D. A. and ELDERIDGE, J. Serological studies in two outbreaks of *Campylobacter jejuni* infection . . . . . 163

ROWE, F. P., PLANT, C. J. and BRADFIELD, A. Trials of the anticoagulant rodenticides bromadiolone and difenacoum against the house mouse (*Mus musculus* L.) . . 171

MATHUR, R. P. and PRAKASH, I. Evaluation of brodifacoum against *T. indica*, *M. hurrianae* and *R. rattus* . . . . . 179

NATALI, A., OXFORD, J. S. and SCHILD, G. C. Frequency of naturally occurring antibody to influenza virus antigenic variants selected *in vitro* with monoclonal antibody . 185

MANN, P. G., PEREIRA, M. S., SMITH, J. W. G., HART, R. J. C. and WILLIAMS, W. O. Joint Public Health Laboratory Service/Royal College of General Practitioners Working Group. A Five-Year Study of Influenza in Families . . . . . 191

MASUREL, N., OPHOF, P. and DE JONG, P. Antibody response to immunization with influenza A/USSR/77(H1N1) virus in young individuals primed or unprimed for A/New Jersey/76(H1N1) virus . . . . . 201

GRILLI, E. A. and DAVIES, J. R. Influenza B at Christ's Hospital: natural antibody to influenza B estimated by radial haemolysis . . . . . 211

HARVEY, R. W. S. and PRICE, T. H. Comparison of selenite F, Muller-Kauffman tetrathionate and Rappaport's medium for Salmonella isolation from chicken giblets after pre-enrichment in buffered peptone water . . . . . 219

SAMUEL, J. L., ECCLES, J. A. and FRANCIS, J. Salmonella in the intestinal tract and associated lymph nodes of sheep and cattle . . . . . 225

STANLEY, SUSAN J., HOWLAND, C., STONE, M. MARY and SUTHERLAND, I. BCG vaccination of children against leprosy in Uganda: final results . . . . . 233

KANGRO, H. O., JACKSON, C. and HEATH, R. B. Comparison of radioimmunoassay and the gel filtration technique for routine diagnosis of rubella during pregnancy . 249

MAKINO, S., ISHIGURO, N., SATO, G. and SENO, N. Change of drug resistance patterns and genetic properties of R plasmids in *Salmonella typhimurium* of bovine origin isolated from 1970 to 1979 in northern Japan . . . . . 257

WICKREMESINGHE, R. S. B. *Corynebacterium haemolyticum* infections in Sri Lanka . 271

HART, C. J., GIBSON, MARJORIE F. and BUCKLES, ANDREA M. Variation in skin and environmental survival of hospital gentamicin-resistant enterobacteria . . 277

MUGG, P. and HILL, A. Comparison of the Microbact-12E and 24E systems and the API-20E system for the identification of *Enterobacteriaceae* . . . . . 287

ROTIMI, V. O. and DUERDEN, B. I. *Bacteroides* species in the normal neonatal faecal flora . . . . . 299

KENNETT, M. L., DONALDSON, A., MARSHALL, J. A. and WILLIAMSON, H. G. Echovirus type 11 infection in Melbourne-1953 to 1980 . . . . . 305

THOMAS, MAIR E. M., LUTON, P. and MORTIMER, JANET Y. Virus diarrhoea associated with pale fatty faeces . . . . . 313

SMITH, G. R. and OLIPHANT, JANET C. The ability of *Mycoplasma mycoides* subspecies *mycoides* and closely related strains from goats and sheep to immunize mice against subspecies *capri* . . . . . 321

COX, J. C., EDMONDS, J. W. and SHEPHERD, ROSAMUND, C. H. Toxoplasmosis and the wild rabbit *Oryctolagus cuniculus* in Victoria, Australia with suggested mechanism for dissemination of oocysts . . . . . 331

No. 3 (December 1981)
